EDUCATION

Bachelor of Computer Science

West Chester University of Pennsylvania ✍

08/2016 – 12/2020

PROJECTS

Simon Game (HTML5, CSS3, JavaScript, jQuery) ✍

Personal Budgeting App (Node.js, Express.js) ✍

PROFESSIONAL EXPERIENCE

Fearless ✍

Software Engineer

08/2023 – present

- Developed, tested, and maintained advanced software solutions to optimize user experience and business processes.
- Collaborated across front-end, back-end, and operations teams to design scalable and efficient software.
- Improved code quality through peer reviews, exploratory testing, and adherence to best practices.
- Automated operational workflows to streamline deployment and troubleshooting.
- Led team initiatives to enhance knowledge-sharing and foster team cohesion.

Orbis Technologies ✍

Software Engineer

12/2020 – 01/2023

- Engineered and integrated data sources, applications, and services into Orbis Technologies' products.
- Debugged and optimized software using Visual Studio Code and IntelliJ IDEA.
- Expanded existing software functionality by implementing new features in Linux environments.
- Maintained build and infrastructure code using GitLab, ensuring version control best practices.
- Developed full-stack applications utilizing Angular 8+, TypeScript, Java, Spring Boot, MongoDB, MarkLogic, and Docker.
- Utilized the Atlassian Suite (Jira, Confluence) to track progress and update sprint documentation.

PrimePay Financial Services ✍

QA Systems Analyst Intern

05/2019 – 08/2019

- Collaborated with business analysts, architects, and developers to deliver enterprise software solutions.
- Created and executed comprehensive test plans, tracked defects, and ensured system stability.

West Chester University

IT Consultant Intern

12/2018 – 05/2019

- Provided technical support to students and faculty, resolving network and system issues efficiently.
- Diagnosed and troubleshooted wired and wireless network connectivity problems.
